

YARDAGE BOOK

# COWBOYS GOLF CLUB

GRAPEVINE, TEXAS

---

**BLACK TEES · 7,017 YARDS · PAR 72**

Converted to the No.1 Golf book format

from a Shot Pattern source book

Conforming to Model Local Rule G-11

- **146** <sup>+3</sup> — elevation change from here to the green
- **(163)** 225 — (to the CENTRE of the green)
- from the black tee

|                     |                                                |
|---------------------|------------------------------------------------|
| <b>Boxed number</b> | arc at that distance to the front of the green |
| <b>(A) (B) (C)</b>  | carry distance from the black tee              |
| <b>Dark tee box</b> | the black tee                                  |
| <b>Green fill</b>   | putting surface; pale green is short grass     |

|                     |                                                 |
|---------------------|-------------------------------------------------|
| <b>5 × 5 grid</b>   | the surface split into fifths both ways         |
| <b>Edge numbers</b> | yards from the front edge, from the source book |
| <b>Depth ruler</b>  | yards from the front along the line of play     |
| <b>Scale</b>        | never larger than 3/8 inch to 5 yards           |

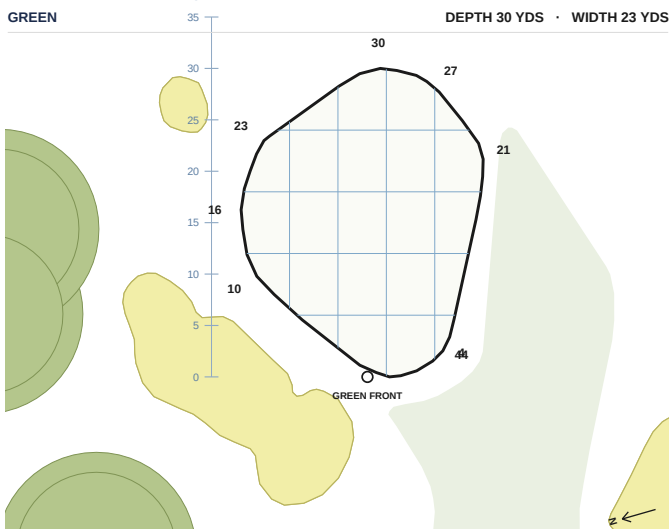

|                         |                                          |
|-------------------------|------------------------------------------|
| <b>Source</b>           | Shot Pattern book, vector PDF, 39 pages  |
| <b>Scale</b>            | circle-fit on the source range arcs      |
| <b>Front and centre</b> | computed from the source green outline   |
| <b>Elevations</b>       | the source book's own per-station values |
| <b>Carries</b>          | the source book's own printed numbers    |

Every carry number printed in the source book was re-derived from the extracted geometry. Across 38 numbers the median difference is 0.4 yards and the largest is 2.0 yards.

The source book carries no green contour or slope data, so the centre of each green page is left open. That needs a survey or lidar, not a conversion.
